Learning Autobiography

Students will write a seven- to eight-page, double-spaced learning autobiography, a paper that describes their development as a learner and incorporates as many of the themes, concepts, and theories discussed in the course as are appropriate. Students will analyze their life experiences and reflect on their beliefs about how humans learn and the situations and contexts that have had an impact on the development of their personal beliefs or attitudes about learning. Students do not have to use any sources while writing this paper, but if sources are used, student are expected to combine their own thoughtful analysis with ideas and information found in them. Therefore, as in any scholarly writing, students should not merely copy information from another author, but use evidence to support the contentions they have drawn from their findings and critically analyze related literature. This paper must meet APA requirements of format and style. Students must cite the sources of all ideas, facts, and information used that are not their own, even if they have put the information into their own words. Failure to do so is plagiarism, even if the oversight is unintentional.

Observation Project: Theory into Practice Paper

Students will write a six- to eight-page, double-spaced paper that demonstrates the ability to apply learning theory to practice. Students will choose a concept or principle of human learned behavior. Representative examples include mastery learning, decision performance, choice, transfer of motor skill learning for expert performance, transfer of cognitive learning, or other learned behaviors. This representative list is only for example; there are numerous topics related to human learning and learned behavior. Students should choose a topic that is of personal or professional interest to the student. NOTE: Paper topics must be approved by the instructor, and students will be provided details in how to have their topic approved.

In this paper, students will analyze the chosen topic using concepts from the course, and discuss such elements as a detailed description of the topic, description of the theory or theories used by the student to analyze it, analysis of the fundamental learning and behavioral principles that influence the topic, and other analytical and evaluative considerations specific to the chosen topic and in the context of learning and behavior. This list is only representative of the elements the student should address in the paper; it is not exhaustive. The course instructor will provide additional detailed guidelines for this paper. In the paper, students are expected to combine their own thoughtful analysis with ideas and information found in scholarly sources. Therefore, as in any scholarly writing, students should not merely copy information from another author, but use evidence to support the contentions they have drawn from their findings and critically analyze related literature - this paper has to be an analytical paper, not a summary of readings. This paper must meet APA requirements of format and style. Students must cite the sources of all ideas, facts, and information used that are not their own, even if they have put the information into their own words. Failure to do so is plagiarism, even if the oversight is unintentional.
